Professional Summary

Software Development Engineer II with **hands-on experience** building and maintaining scalable, responsive web applications across frontend and backend technologies. Experienced in **React.js, Node.js, Express.js, MongoDB, PHP CodeIgniter, RESTful APIs, JWT authentication, RBAC, and API integration**, with a strong focus on clean architecture, performance optimization, and secure application development. Experienced in **migrating legacy PHP modules to React.js**, working with **monorepo architectures**, and leveraging **AWS services** for application infrastructure and deployment. Additionally skilled in **n8n workflow automation** and **Supabase**, enabling efficient business processes and scalable backend solutions. Strong problem-solving and collaboration skills with a focus on delivering reliable, user-centric software solutions.

Skills

- **Frontend:** React.js, JavaScript, Redux Toolkit, React Router, HTML5, CSS3, Bootstrap, Responsive Design
- **Backend:** Node.js, Express.js, PHP, CodeIgniter, RESTful APIs, JWT, RBAC
- **Database:** MongoDB, PostgreSQL, MySQL, Supabase, Sequelize ORM
- **Cloud & DevOps**: AWS, Git, GitHub, Firebase, Vercel, Deployment
- **Automation & Tools:** n8n, API Integration, VS Code
- **Architecture:** Monorepo, Authentication, Authorization, Performance Optimization

---

Work Experience

MERN Stack Developer (Frontend & Backend) [December 2023 – August 2025]
Sparkle Infotech

Projects:
SKU Markets (Wholesaler e-commerce):
- Developed 15+ reusable React.js components improving UI consistency and reducing dev time by 25%.
- Optimized performance for seamless user experience and integrated backend APIs.
- Worked on dynamic routing and navigation using React Router.

Rediminds AI:
- Contributed to both backend and frontend development to build a robust AI driven platform.

- Designed and developed RESTful APIs for data retrieval and submission using Node.js and Sequelize ORM.

- Ensured efficient database interactions by implementing complex queries and schema optimization.

- Enhanced the user interface with dynamic components, ensuring a responsive and intuitive experience.

Zync:
- Developed a dynamic content management system (CMS) using Webflow, enabling seamless updates and management of educational resources.
- Focused on optimizing usability and workflows for seamless content updates.
- Collaborated with cross-functional teams to ensure project goals were met efficiently.

Software Development Engineer II (SDE II) [February 2026 – Present]
Codewinglet Pvt. Ltd.

Projects:
Christie Barbecue Solution:
- Contributed to the development and maintenance of a **monorepo-based application** using **PHP CodeIgniter and React.js**.

- Worked across both **frontend and backend development**, with core modules built using PHP CodeIgniter and selected modules developed in React.js.

- Contributed to the **migration of legacy PHP modules to React.js**, improving frontend architecture, maintainability, and user experience.

- Implemented **Role-Based Access Control (RBAC)** to manage user permissions and secure access across application modules.

- Designed and integrated **refresh token authentication logic** to improve authentication security and session management.

- Worked with **AWS services** for application infrastructure, deployment, and cloud-related requirements.

- Collaborated on feature development, API integration, debugging, performance optimization, and maintenance across frontend and backend modules.

Education

Bachelor of Computer Applications (BCA) [2019 – 2022]
Sutex Bank College of Computer Application and Science
Achieved a CGPA of 7.65.
Final Year Project: Developed a car rental platform using React.js and Node.js.

Master of Computer Applications (MCA) [2022 - 2024]
Department of Computer Science, VNSGU
Key Project: Box Cricket Booking Webapp using Laravel. The platform included features such as an admin panel, user booking panel, and more.
